Frantic Films is looking for a Pipeline Software Developer

Primary Role:

To author coded automation or tools based on the specifications provided by a Pipeline Designer, conduct research to find the best approach to implementing a coded solution, and provide recommendations back to the Designer. The Pipeline Developer reports to the Head of Pipeline (aka Pipeline Supervisor), but may not be in the same geographical region as the Head of Pipeline

Specific duties and responsibilities include:

1. Analyze and design company wide workflow and communications software infrastructure.
2. Develop tools that integrate into various artist applications and graphics packages in addition to linking directly with the company's central database.
3. Assist in the creation of solutions or workarounds for technical problems through scripting or other appropriate means as they arise.
4. Make all tools accessible and operational for artists with a strong focus on usability.
5. Develop tools and utilities for individual projects or general use in the production pipeline.
6. Uphold quality standards and vision set forth by the Head of Pipeline.

We are looking for someone who:

1. Responds well to pressure, and work well in a team environment.
2. Enjoys working with a diverse group of technical co-workers.
3. Has a sense of humor about him/herself.
4. Can learn quickly in a fast paced environment.
5. Has strong organization capabilities and is detail oriented.
6. Exhibits a flexible attitude and can manage his or her time effectively.
7. Can prioritize effectively and zero in on the important tasks.
8. Has a well rounded knowledge of mainstream software packages (Word, Excel, etc.).
9. Computer Science Degree or related experience.
10. Experience with C# coding standards. Knowledge of Python, Perl, or Lua a plus.
11. Familiar with web technologies (ASP.NET, PHP, etc.) and a wide variety of graphics applications and scripting languages.
12. Knowledge of database schemas and data structures.

This position is a permanent full time position and remuneration will be commensurate with qualifications and experience.

If you feel your skill set meets the above criteria, please email your resume to:
